

## **Personal Protective Equipment (PPE)**

### 7 am to 9pm daily

Please contact the SPD department for PPE.

- Please know the size and model of the N95 mask that you wear, which will be validated by the fit testing log provided by employee health.
- PAPR (power air purified respirator) are located in SPD with the disposable hood (please note at this time the hood should be wiped down with bleach wipe or purple top wipe after dry please bag and label for **your** future use)

### Off hours for 9pm to 7am (evening)

- Second floor satellite pharmacy will have N95 masks and hoods if needed for patient care only (please note at this time the hood should be wiped down with bleach wipe or purple top wipe, dry then please bag and label for **your** future use)
- You must know the size and model of the N95 mask you wear, which will then be validated by the fit testing log provided by employee health
- The PAPR will be stored in SPD and will require security to open the department to sign out the unit.

N95 respirator is the disposable face mask

PAPR is the battery powered blower

Hood is the head gear that is used with the PAPR
